

A Word to All the University Members

Recently, the use of reusable cups has increased rapidly as reusable cups have been fully used in on-campus cafes.

In addition, the number of cases of reusable cups being thrown away in general trash bins or taken for personal use has also increased, and 16,892 cups have not been returned in the past two weeks.

If the current situation continues, there is a risk that the supply of cups will be cut off in April due to budget shortages.

Please return reusable cups that are lying around at home, in your room, or in the office to the return box.
